

## Marriage Insurance: For Your Whole Life

**Fact:** In the United States today, over 50% of marriages fail.

**Fact:** Couples who practice Natural Family Planning (NFP) show a divorce rate of less than 4% and describe their marriages as “very happy”.

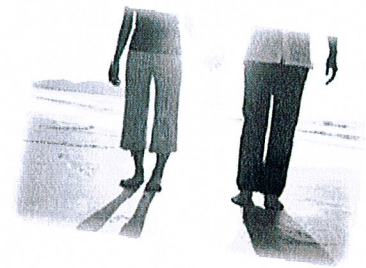

*Why is **NFP** successful Marriage Insurance?  
It's all about a couple's **relationship**.*

**NFP** uses scientific fertility measures that require couples to **communicate** daily about the intimate details of their married life so they can form a deep and meaningful **relationship**.

**NFP** keeps husbands and wives honest. Not only must couples **communicate** about their fertility, but also their hopes, dreams, fears and struggles.

**NFP** deepens **bonding**. Couples who practice NFP do not have to contend with the divisiveness of devices or the adverse effects of hormonal pills and drugs that can hamper 100% self-giving love.

**NFP** can be practiced by any couple, regardless of their reproductive circumstances. It is an insurance investment for your marriage you won't regret.

**NFP is good for me, for my health and for my marriage.**
